

### **Biopsy Wound Care Instructions**

1. Leave bandage on until the next day.
2. You may wash and shampoo as you normally would after the bandage is removed.
3. It is not necessary to cover the wound if you are staying indoors. A Band-Aid must be applied if you are outside for the next 3 days.
4. Use a SMALL amount of the antibiotic ointment given to you once a day for the first three days.
5. You may take Tylenol or Extra-Strength Tylenol for any discomfort. No Aspirin or Advil products.
